

Your safety is our priority

SWITCH STAR

New innovative technology

Application

Switch Star aims to revolutionise safety standards in power outlets.

Switch Star is designed to automatically shut off power to any connected device **after 8 hours**, mitigating the risk of overcharging incidents.

Our general power outlet (GPO) is easily installed by any licensed electrician, no programming or configuring, no internet required, no apps required, no FUSS.

Once installed simply press the power button on, the GPO will then operate for a maximum of 8 hours until the power button is pressed again for another 8 hour power cycle.

Prevent battery overcharging risks in your home or business with Switch Star.
